§ 426.15

designated as nonexcess when involuntarily acquired, for all irrigation water delivered to the land in question while the land was designated as excess.

- (g) Effect of involuntarily acquiring land subject to the discretionary provisions. A landowner does not automatically become subject to the discretionary provisions if the landowner acquires irrigation land involuntarily which was formerly subject to the discretionary provisions. However, a landholder that is subject to the prior law provisions will become subject to the discretionary provisions upon involuntarily acquiring land if:
- (1) The land is located in a district that is subject to the discretionary provisions:
- (2) The landholder in question will be the direct landowner of the land; and
- (3) The landholder in question declares the land as nonexcess.
- (h) Land acquired by inheritance or devise. If a landowner receives irrigation land through inheritance or devise, the 5-year eligibility period for receiving irrigation water on the newly acquired land per paragraphs (c)(3) and (e) of this section begins on the date of the previous landowner's death.

§ 426.15 Commingling.

(a) Definition for purposes of this section:

Commingled water means irrigation water and nonproject water that use the same facilities.

- (b) Application of Federal reclamation law and these regulations to prior commingling provisions in contracts. If a district entered into a contract with Reclamation prior to October 1, 1981, and that contract has provisions addressing commingled water situations, those provisions stay in effect for the term of that contract and any renewals of it.
- (c) Establishment of new commingling provision in contracts. New, amended, or renewed contracts may provide that irrigation water can be commingled with nonproject water as follows:
- (1) If the facilities used for the commingling of irrigation water and non-project water are constructed without funds made available pursuant to Federal reclamation law, the provisions of Federal reclamation law and these regulations will apply only to the land-

holders who receive irrigation water, provided:

- (i) That the water requirements for eligible lands can be established; and
- (ii) The quantity of irrigation water to be used is less than or equal to the quantity necessary to irrigate eligible lands.
- (2) If the facilities used for commingling irrigation water and nonproject water are funded with monies made available pursuant to Federal reclamation law, landholders who receive nonproject water will be subject to Federal reclamation law and these regulations unless:
- (i) The district collects and pays to the United States an incremental fee which reasonably reflects an appropriate share of the cost to the Federal Government, including interest, of storing or delivering the nonproject water; and
- (ii) The fee will be established by Reclamation and will be in addition to the district's obligation to pay for capital, operation, maintenance, and replacement costs associated with the facilities required to provide the service.
- (3) If paragraphs (c)(2) (i) and (ii) of this section are met, the provisions of Federal reclamation law and these regulations will be applicable to only those landholders who receive irrigation water. Accordingly, the provisions of Federal reclamation law and these regulations will not be applicable to landholders who receive nonproject water delivered through facilities funded with monies made available pursuant to Federal reclamation law if those paragraphs are met.
- (d) When Federal reclamation law and these regulations do not apply. Federal reclamation law and these regulations do not apply to landholders receiving irrigation water from federally financed facilities if the irrigation water is acquired by an exchange and that exchange results in no material benefit to the recipient of the irrigation water.

§ 426.16 Exemptions and exclusions.

(a) Army Corps of Engineers (Corps) projects. (1) If Reclamation determines that land receives its agricultural
